SUMMARY

Dynamic Software Engineer with a strong background in full-stack development. Over 3 years of hands-on experience in designing and implementing innovative solutions using technologies such as React, Node.js, and Python frameworks including Flask and FastAPI. Adept at guiding teams in mastering diverse technologies and providing technical leadership. Proven track record of contributing to the development of web applications, ensuring responsiveness, and enhancing user experiences. Passionate about problem-solving and continuous learning, with a history of successful internships at tech hubs and charitable foundations, fostering innovation and proficiency in various programming languages and frameworks. BSc in Computer Science from Alex Ekwueme Federal University, Ndufu Alike Ikwo.

EDUCATION

Alex Ekwueme Federal University, Ndufu Alike Ikwo

Bachelor's Degree in Computer Science
2019 – 2023

ALX Africa

Software Engeering
20191 – 2022

SKILLS

- Proficient in front-end technologies: React, Vite, HTML, CSS, JavaScript
- Expertise in back-end development: Node.js, Express.js, Python, Flask, FastAPI
- Skilled in version control with Git
- Strong problem-analysis and solving abilities
- Knowledgeable in database technologies: MongoDB, SQLite
- Familiarity with the Tailwind CSS framework
- Excellent collaboration and mentoring skills
- Experience working in team environments on diverse projects
- Continuous learning and staying current with technological advancements

CERTIFICATIONS

- Software Engineering Certification
- Computer Science Certification

PROFESSIONAL EXPERIENCE

Software Engineering

Exotic MGA Tech Hub LTD | January 2023 - May 2023

- I worked in a team that developed document authentication software.
- I enhanced my Python and Flask framework Skills.
- Provided suggestions in key areas of development and implementation of the company's software.

Software Engineering Intern

ALX Africa, Nairobi, Kenya | July 2022 - August 2023

- Worked in a team of three in developing a simple web server.
- Worked in a team of four in developing a travel accommodation web application.
- Worked in a team of two in reimplementing the printf library.
- Enhanced my proficiency in problem-solving, C programming, Python programming, data structure and algorithm, and Frontend technologies like HTML, CSS, Typescript, React and Tailwindcss framework.

Student Volunteer

LOTS Charity Foundation, lagos, Nigeria | January 2019 - October 2019

- Volunteered in training secondary school students on technology.
- Volunteered in training student on personal development.
